

ALEXANDER BLACK

255 High Street Apt 621 Atlanta, GA 30346
(256) 783-0269 a.m.black@hotmail.com

PROFESSIONAL SUMMARY

Adaptable Project Manager with experience in fast-paced, international capex technology integration projects delivery. Skilled in installation oversight, construction coordination, and process optimization across customer-facing and multi-vendor environments. Proven ability to manage multiple concurrent deployments, interpret technical documentation (3D models, 2D drawings, network diagrams, electrical schematics), and align cross-functional teams to meet aggressive timelines. Fluent in German; dual U.S./German citizen.

EXPERIENCE

ISRA Surface Vision

Project Manager

September 2022 – Present

Responsible for the simultaneous execution of multiple Machine Vision projects within budget, schedule, scope and risk parameters. Responsible for leading project teams and maintaining project communication and documentation, including critical path analyses. Primary interface to customers for project implementation.

- Technical system implementation – Experienced in the delivery, installation and implementation of complex technical solutions including the interpretation and application of mechanical drawings, wiring diagrams, and network schematics to guide system integration.
- Machine Vision – Responsible for the deployment of Machine Vision solutions combining mechanical, electrical, and software engineering to the metals and papers industries
- Defining Requirements and Allocating or Procuring Resources – adept at clearly delineating project needs and coordinating with engineering, field service teams, and vendors to execute on-site deployments, supervise subcontractors, and resolve installation challenges. Demonstrated ability to creatively close resource gaps.
- Process creation and optimization – Experienced in designing, implementing and improving project delivery processes. Conducted review of organizational project management processes for senior leadership
- International communication and collaboration – Proven ability to maintain team cohesion across multiple time zones, cultures, and languages to deliver projects on-time and on-budget.

US Federal Government – Various Offices

Subsystem Lead, Mechanical/Aerospace/Systems Engineering Intern

May 2016 – August 2021 (5 Semesters)

Acted as mechanical engineer and assistant project manager designing, fabricating, and testing solutions to real-world requirements as well as executing milestone testing of contractor-developed prototypes.

- Produced engineering and programmatic documentation and proposals to secure project continuation funding
- Produced and presented design project summaries to senior leadership

Acted as subsystem lead for aerospace project

- Responsible for documenting and integrating contractor-supplied subsystem into project
- Produced mission models and developed concepts of operation
- Led astronautical training for new personnel

Acted as assistant systems engineer managing satellite propulsion subsystem production

- Completed satellite propulsion system study for follow-on satellite program
- Conducted Review of CDR documentation from prime contractor

TECHNICAL SKILLS

Management Software: Salesforce, MS Project, Epicor, GLOPP, Microsoft 365

Engineering Software: MATLAB, STK, SolidWorks, SolidEdge, Rhino

Fabrication & Manufacturing: SLS, SLA, FDM 3D printing; MIG/TIG welding; CNC & manual machining; sheet metal work

EDUCATION

University of Florida, Herbert Wertheim College of Engineering

May 2022

Bachelor of Science in Aerospace Engineering, Bachelor of Science in Mechanical Engineering

MISCELLANEOUS SKILLS

Language: Fluent in German

Citizenship: Dual US and German Citizen

Communication: Experience leading seminars, producing and presenting briefings for large audiences both in-person and remotely, and producing and presenting briefings for senior leadership
